

Eduardo Castro

Software Engineer · Full-Stack · E-commerce & Integrations

Franca, São Paulo, Brazil · Available for remote opportunities in Brazil and worldwide

eduardocastrodev7@gmail.com · www.educastro.dev · linkedin.com/in/eduardocastro-dev · github.com/eduardocastrodev7

PROFESSIONAL SUMMARY

Full-Stack Software Engineer with hands-on experience in e-commerce, systems integration, APIs, data and automation. At Reise, works across the digital ecosystem, connecting Shopify, ERP, payments, logistics, inventory and data while developing internal applications and operational infrastructure. Combines product perspective, end-to-end technical delivery and an understanding of the business problems behind each solution.

TECHNICAL SKILLS

Frontend: React, TypeScript, JavaScript, HTML, CSS, Liquid, Vite

Backend & integrations: Node.js, Fastify, Python, REST APIs, Webhooks

Data: BigQuery, SQL, Data Pipelines, Analytics

Cloud & infrastructure: GCP, Cloud Run, GitHub

E-commerce: Shopify, ERP, payment gateways, logistics and inventory synchronization

PROFESSIONAL EXPERIENCE

Technology & Development Analyst · Reise

Jan 2025 to Present

- Works on the engineering and evolution of the company's digital ecosystem, including its Shopify platform and internal applications.
- Architects integrations among e-commerce, ERP, payment gateways, logistics and inventory through REST APIs and webhooks.
- Builds and maintains the SSOT platform, BigQuery pipelines, React and Fastify applications, dashboards and operational automation.
- Develops B2B solutions and workflows on GCP and Cloud Run, spanning frontend, backend, integrations and data.

Technologies: Shopify, React, Fastify, BigQuery, GCP, Cloud Run

Co-founder & COO · Cecília Digital

Apr 2025 to Present

- Works on the architecture and development of Shopify e-commerce operations, including migrations, integrations, automation and technical store evolution.
- Combines technical delivery, process definition and business perspective in projects involving ERP, payments, logistics and data.

Shopify Developer · Stars Encoding

Jan 2025 to Present

- Develops and evolves Shopify themes with Liquid, while handling platform migrations and store maintenance.
- Implements API integrations with ERP, logistics and payment systems, as well as operational dashboards.

PROFESSIONAL EXPERIENCE: CONTINUED

UI/UX & Visual Designer · **Reise**

Jun 2024 to Jan 2025

- Mapped user journeys and developed high-fidelity prototypes for websites and systems.
- Maintained the design system and visual identity, applying product and user experience thinking to engineering.

Web Developer · **Contabilizaí Bank**

Dec 2022 to Dec 2023

- Developed responsive web interfaces from design prototypes and maintained applications.
- Contributed to frontend architecture with a focus on user experience in banking products.

Customer Specialist · **Magazine Luiza**

earlier experience

- Worked within a large-scale e-commerce operation, close to the purchase journey, transactional issues and customer experience.

FEATURED PROJECT

SSOT | Operational Data Platform · Reise

BigQuery · Fastify · React · Vite · GCP · Cloud Run

Problem: operational data distributed across multiple systems made a consistent view of the operation difficult.

Solution: built a centralized data, processing and application layer to consolidate and provide operational information.

Impact: centralized the operational view and reduced dependence on manual processes for accessing and interpreting data.

EDUCATION

Systems Analysis and Development · **Estácio**

Expected completion: Jun 2027

Systems development, data structures, databases, software engineering and application architecture.

IT Technician · **Senac São Paulo**

Mar 2016 to Oct 2017 · completed

Practical technical training in information technology and systems development.
